## DAYLIGHT SAVINGS TIME THIS YEAR

November 1st is when Daylight Savings Time starts this year. This is an excellent day to change the battery in your Smoke and Carbon Monoxide Detector. If you need assistance with this, please contact the rental office so a service request may be created. Although there will be a charge for the battery, we are happy to provide this maintenance service for those of our valued residents unable to perform this task. This is also a good time to dust and clean heaters, before you begin to use these.
